DETAILED ACTION

Allowable Subject Matter

1. Claims 13-22 are allowed. The following is an examiner's statement of reasons for allowance: Whereas the prior art of record teaches a method of controlling a dc brushless motor by bringing the speed of the motor to a desired speed by determining the average terminal voltage by pwm, the prior art of record does not teach iteratively repeating the steps combined with the steps of detecting an average power requirement of the motor and a lead angle between a rotor of the motor and a driving magnetic field and approximating the lead angle to a predetermined desired value as a function of the speed and average power requirement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
